

People Development Admin Guide

This guide is designed to support Admin users in setting up and managing People Development effectively. It covers the key steps needed to configure your platform and support staff engagement.

Assigning Admin Permissions

Set up permissions and access for admins and key users.

Assigning Line Managers

Map line managers to individuals and teams.

Assigning Standards & Frameworks

Assign the right standards and frameworks to individuals and groups.

Reporting & Insights

Create reports, extract insights and track key metrics.

Creating Groups

Build groups to reflect your organisations structure.

Uploading Organisation Objectives

Upload and align your organisation's objectives in the platform.

Flood-Filling Objectives & CPD

Bulk assign objectives and CPD where appropriate to save time.

Creating Bespoke Forms & Templates

Design custom forms and templates to suit your organisation's needs.

If you're not sure what you need, we're here to help.

Just get in touch and we'll work with you.

We're here to support you throughout your onboarding journey and beyond.

If you have any questions at any point, just let us know - we're always happy to help!

Email us at: support@nationalcollege.com Helpdesk: nationalcollege.com/pages/support Tel: +44 (0) 333 090 6536

Logging in and activating your account

You should have now received your activation emails, and be able to access your National College account. When you log in, you will land on this dashboard, click the People Development tab from the left-hand navigation.

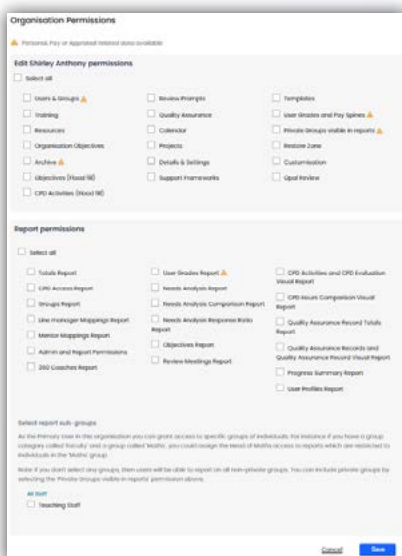

Admin

Everyone starts with the same access in People Development. However, if you manage processes or staff, you may need additional permissions.

To administer, build and manage data across the organisation, you can assign individual admin and reporting permissions to relevant staff.

To be able to assign these permissions, you must first have been assigned Admin permissions within the organisation. ONLY Primary Users are able to assign Report permissions.

Assigning Admin Permissions

You'll need to have been assigned the Users & Groups area in order to assign permissions. If you don't have this option, speak to the People Development lead in your organisation or get in touch with our team.

To assign permissions, head to [Admin > Users & groups > Search](#) or [select the individual](#) you wish to assign permissions to and click into their name [> Edit Organisation Admin Permissions](#), then tick the relevant permissions, [click Save](#), then confirm again to apply the changes. This will be assigned to their account straight away.

Creating Groups

Groups are vital to many aspects of the People Development platform and getting this structure right is extremely valuable in allowing reports, resources and permissions to be filtered by or restricted to.

To create groups in People Development, head to [Admin > Users & groups > Manage Groups](#)

Groups work in a two-layer process. You will need to create a 'Group Category' first, such as 'All Staff' or 'Departments', depending on how you are wanting to manage these.

Then click into the Category you have created, and you will be able to create each group, for example, 'Teaching Staff' and 'Support Staff'.

 A screenshot of the 'Create Group' form. The 'Name' field contains 'Teaching staff'. There is a 'Private' checkbox which is currently unchecked. Below this is a section titled 'Group Tab Visibility' with a warning message: 'Please be aware that by unchecking any of the options below, all users within this group will have the tabs selected removed entirely. This overrides any tab visibility set at the organisation level, and can be overridden at a user level. This will also affect the individual's visibility if they are attached to other schools. Please contact the support team if you are unsure.' A list of tabs is shown with checkboxes: Reviews, Resources, Objectives, CPD, Training, Journal, Calendar, Observations, PLP, Progress, Self Evaluation, Review Meetings, and Opal Review. All checkboxes are currently checked.

You can choose to turn off certain tabs for specific groups of staff, for example if you have an 'Admin' group who will not be completing Observations, you could turn this tab off for them to streamline their dashboards. You also have the option to make a group Private.

Tip: A private group can be useful, for example, if you need to create a "Cause for Concern" or "Disciplinary" group. This allows you to report on the group easily, while ensuring that staff members included in it are not aware they belong to that group.

Once you have pressed 'Save', it will show your staff list, simply tick on/off the relevant staff members for that group. You can come back here at any time to add additional staff, rename or delete the group.

- [Full Admin Guide](#)

Assigning Line Managers

Creating your Appraisal / Line Manager structure is an important step within the People Development app.

* Please note, Line Managers will have access to: CPDs, Objectives, Review Meetings (including Pay Spine if applicable), Standards and Observations (through reports) of all of the staff they line manage.

Bulk assigning line managers is the easiest way to create your structure. To do this, head to Admin > [Users & groups](#) > [Manage Users](#) > [Bulk Assign Line Managers](#)

From the drop-down menu, choose the first Line Manager and click Select. Then, tick the names of the staff that Line Manager should manage. Next, return to the drop-down to select the following Line Manager, making sure to press **Select** each time so the view updates, and repeat the process until all Line Managers have been assigned.

Tip: Use the Line Manager Mappings Report to sense-check. This can be refreshed as you go.

Supporting Guides

- [Setup & Settings: Manager Mapping](#)
- [Full Admin Guide](#)

Assigning Standards

You are able to assign standards for staff to self-reflect against. This can be done in bulk to all staff, by groups of staff, or individually select the relevant staff, so that they have their relevant standard preset within their profile.

To do this, head to **Admin > Standards > Bulk Assign Standards**

Supporting Guides

- [Bulk assigning Standards in People Development](#)

Pre-populating/Flood-filling Objectives

If you wish to pre-populate (whole-school/department-specific) objectives to staff, you are able to do this in bulk across all staff or by groups of staff (when these are set up).

To do this, head to **Admin > Flood fill > Objectives**, select the individual(s), group(s) or use the 'Select All' button, depending on who you are assigning the objective to, then press '**Next step**'.

This will then come up with the Objectives Setting form, and you can populate this as needed.

Tip: You may wish to just populate the Objective title as a theme and leave the additional boxes for staff to personalise with their role-specific action steps etc. This is useful to ensure consistency but also allows for flexibility.

Click **'Next step'**. Here you will be able to link it to strands within the School Development Plan, if/when it is in, if you choose to. Press **Save**, this will then populate to all selected staff members and show a green banner to show it has been successfully created.

Objective successfully created

Supporting Guides

- [Setting, editing and deleting admin-led \(flood filled\) objectives](#)

Pre-populating/Flood-filling Development Activities

If you wish to pre-populate development activities/CPD to staff, you are able to do this in bulk across the whole school or by groups of staff (again, when these are set up).

To do this, head to **Admin > Flood fill > Development Activities**, select the individual(s), group(s) or use the 'Select All' button, depending on who you are assigning the activity to, then press **'Next step'**.

Flood Fill Development Activities: Step 1

Development Activities

Please contact our helpdesk if you haven't used this tab before.
Select users below or use 'Group select' to automatically select users.

Individuals (0)

☐ Lionne Butler
lionne.butler@nationalcollege.com

Group select

☐ Select All (visible) ☐ Deselect All (visible)

All Staff

Support Staff (0 individuals)

Teaching Staff (0 individuals)

Link Development Activity to:

☐ The National College

Next step

You can choose to pre-populate either National College courses or your own bespoke activities, if you had maybe some in-house training or external providers.

Ticking the 'The National College', will take you to a page where you are able to search for the relevant National College course.

Link CPD Activity to:

☐ The National College

Next step

Leaving The National College unticked will take you to the blank form.

On the blank form, you will be able to populate with your own data as necessary, as well as link to Organisation Objectives/SDP, set a renewal date, as well as mark as 'Completed' if this may have been a whole-school activity that has already taken place.

Flood Fill CPD Activities: Step 2 (final step)

CPD Approval
CPDs linked to this organisation always require approval

Is this CPD Activity mandatory?*

☐ Mandatory
This CPD Activity is a mandatory activity for you.

☒ Not mandatory
This CPD Activity is not mandatory for you.

CPD Activity title*

Description*

Intended outcome*

You can also create Training Events, which may be easier for recurring in-house activities, as you can duplicate these each year/as necessary and just amend the dates as needed.

Tip: Training events are useful for optional training – The Training feature will give staff a noticeboard-style area where they are able to look through upcoming activities and choose to book on if they would like.

Uploading your Organisation Objectives/School Development Plan

Uploading your SDP ensures that everyone's professional records can link to your team/organisation's plan. Staff will be able to link their personal objectives, CPD and QA records. You are also able to link strands of the SDP to any whole-school/flood-filled objectives/Development activities.

To upload this, head to [Admin > Organisation Objectives](#)

This follows a two-layer process. First, you create your overarching priorities (for example, Behaviour or Quality of Education). Within each priority, you can then add the relevant objectives/strands.

You have the ability to restrict objectives to specific staff groups. For instance, a Leadership strand could be limited to an SLT group, while a subject-specific priority might only be available to the relevant department group, provided your groups are set up in that way.

Supporting Guides

- [Set up and Manage your Organisation Objectives](#)
- [Full Admin Guide](#)

Reporting

People Development offers a wide range of reporting options depending on the sort of data you wish to capture.

A good report for running early on is the **Totals Report**, which will give a quick snapshot view of where your staff members are in relation to what records have been added or completed.

The Totals Report will provide numerical data against the whole staff list and will provide total numbers of Standards Reflections, Objectives, CPD activities, Review Meetings and Quality Assurance records (depending on what you are looking for) and is filterable by date range and staff members/groups of staff if desired.

The benefit of this report, as mentioned, is that it will show all staff, as opposed to other reports that will only show the data of staff that have records – the Totals Report, will easily identify staff that may need a little nudge or extra support as it will show records as '0', for example.

Supporting Guides

- [Running Reports: The Totals Report](#)

There is also a bank of additional reports which will pull more granular detail, and the majority of reports run using the same format.

Reports

Management of BlueSky

Totals Report

Provides numerical data, searchable by date and individual or group which provides totals of Reviews, Objectives, CPD, Quality Assurance Records, PLP, Review Meetings, Self Evaluation records and Projects. Includes the individual's line manager(s) and group(s).

Supporting Guides

- [Running Reports: The Objectives Report](#)
- [Running Reports: The Meetings Report](#)
- [Running Reports: The Quality Assurance Reports](#)
- [Running Reports: Needs Analysis Report](#)
- [Which People Development Report Should I Use?](#)

Additional reports for housekeeping are the Line Manager Mappings Report, Groups Report and Admin and Report Permissions report.

If you want to run a full report for all data on one member of staff, use the **Progress Summary Report**. For this report, you simply select the academic year or date range you are looking at and the relevant staff member. Then Submit – This will produce an exportable PDF document.

Progress Summary Report

You can launch a Progress Summary Report for viewing, exporting to PDF or printing.

Creating Bespoke Forms

You will likely already have your core forms set up within the system. However, you can also create additional forms in People Development to suit your organisation's needs.

These may include:

- Meeting templates (e.g. Supervisions or Probation reviews)
- Quality Assurance forms (e.g. Learning Walks or Curriculum Reviews)

Supporting Guides

- [Review Meetings: Creating and managing custom meeting forms](#)
- [Quality Assurance: Building & reporting in the QA feature](#)

This should give you a strong foundation to get started. As your use of the platform develops, you can build on this setup to further support your school's priorities.

* Please note, if there is anything you are unsure of, you are able to access the Helpdesk via your profile icon in the top-right corner, which is full of step-by-step guides and quick video tutorials for all areas within the app.

There is also a link to contact our support team, should you wish to. Alternatively, please feel free to reach out to the support team directly: support@nationalcollege.com
